NEMZETKÖZI ÁRUFUVAROZÁSI ÉS SZÁLLÍTMÁNYOZÁSI BT.

ABOUT OUR COMPANY

The predecessor of **Camion-Group 2000 Bt** was formed as a private enterprise in April 1989. We had a 22-year-old truck and hired site at that time. Since then our company has evolved significantly and today we have 55 own trucks and 10-20 trucks of subcontractors, the company has its own site, and has been operating in road freighting and transportation effectively.

Since December 1999 we have been working in accordance with ISO 9001 Quality Management System.

Our Main Activities:

- International Freighting and Transportation
- Logistics Services

Accomplishing of Activities:

We organise our routes after receiving transport orders. In accordance with the orders the trucks stand off on time in order to accomplish freights so that the consignee – depending on the destinations – receives the goods even the next morning, at an exact time determined previously.

In favour of fluent task solving we operate 0-24 hour dispatcher service, so thus we are able to guarantee the accurate task execution.

Our Services:

- Export-import transportation of stocks, semi-finished products, finished goods, different types of grain in bulk
- \succ 24 hour dispatcher service
- > In case of technical failures we grant spare trucks

Types and Specifications of Our Vehicles:

- Semi-trailers, swap semi-trailers 85-103 m³ with 24-26 tons of carrying capacity
- \blacktriangleright Swap bodies, 120 m³ semi-trailers with 22 tons of carrying capacity
- Padded, fixed and self-discharging trailers
- Volvo trucks with mean age of 4, equipped with GSM telephones and GPS tracking system
- > Vehicles with technical and aesthetic conditions that meet the international norms

From the beginning we have been accomplishing international freighting and transportation according to CMR international standards / regulations.

We are members of Magyar Közúti Fuvarozók Egyesülete (Association of Hungarian Road Freighters) and our CMR liability insurance is effective up to EUR 250,000.

Our company firstly used vehicles adequate to environmentally friendly EURO 2 standards in 1997. The image of our fleet was developed in accordance with it. Since then we have either been using vehicles adequate to the actual EURO norms hoping that we call everybody's attention to the protection of our environment.
